- a) Talk to your child about 'My Healthy Plate' and highlight the importance of different food groups in our diet. Teach them how to choose a combination of dishes using the 'quarter-quarter-half' method so they learn to incorporate all food groups in their meals.

Here is an example of a meal that is not well-balanced, and a couple that are:

# Help your child succeed in life

## Work with the school to know and support your child

- Have regular conversations with teachers in both academic and non-academic areas – this will help you better guide your child's development.

- Check the teachers' preferred mode of communication – they are not required to share their mobile numbers.

- Understand that teachers may not be able to respond to your queries immediately.

## Help your child relate to others

- Work with the teachers to help your child respect differences and resolve disagreements amicably.

- Let the school verify the facts in any incident before taking action to ensure a fair, objective outcome for all parties.

Our children do best when schools and parents work hand in hand to support them. Here are some tips to make this happen...

## Help your child develop good habits

- Create a conducive home environment for your child to enjoy reading and to finish his/her homework by himself/herself.
- Encourage your child to live a healthy, balanced life with time for sleep and play.

## Help your child manage himself/herself

- Guide your child in managing his/her time.
- Encourage your child to help out with household chores.

Our children succeed when parents and schools work hand in hand.
